

Uninstall / Delete / Remove Package

Just use the following syntax:

```
sudo apt-get remove {package-name}
```

For example remove package called mplayer, enter:

```
$ sudo apt-get remove mplayer
```

Remove package called lighttpd along with all configuration files, enter:

```
$ sudo apt-get --purge remove lighttpd
```

To list all installed package, enter:\

```
dpkg --get-selections
```

```
dpkg --get-selections | less
```

```
dpkg --get-selections | grep -i 'http'
```
